

COMB and HEAD TUTORIAL by Tom Roebuck (March, 2015)

Young Black male. Pretty decent comb and head.

Young Black male. Pretty decent comb and head.

Young Cockerel - Pretty good head although only four points on his comb.

Young Cockerel - Pretty good head although only four points on his comb.

Decent comb but not a great head. Beak is too long and not enough skull over eye. He's a bit crow-headed.

Decent comb but not a great head. Beak is too long and not enough skull over eye. He's a bit crow-headed.

Good comb. His head would look better if he had a shorter distance from the tip of his beak to the back of his skull.

Good comb. His head would look better if he had a shorter distance from the tip of his beak to the back of his skull.

Good head on this Buff male but his comb, although five pointed is a little too big.

I like the head on this Self-Blue male. His fifth point has that little extra point on it, so I'll fault him for that and I'd like to see the blade a tad shorter. All in all a pretty good head for a Cochin Bantam male.
